## BuilderMT & CG Visions Ink Alliance & Integration Agreement, Bridging the Last Digital Workflow Gap Between “Building Informing Models” (BIM), Sales, Estimating, Accounting, & Purchasing

*CG Visions’ Building Information Modeling Integrates Digital Design and Options Selection with BuilderMT and its Software Partners*

**Lakewood, Colorado – June 17, 2008** – BuilderMT, the nation’s leading provider of production management software for the construction sector, today announced a new integration and marketing alliance with CG Visions. CG Visions is a “Building Information Modeling” (BIM) provider that also offers 3D design, material takeoffs and graphical-option-selection systems through their service offerings: BIM consulting, Residential Plan Service, Option management, Marketing Services, and their web based flex floor plan configuration tool – e-HomeInVision™.

For the first time, a homebuilder using BuilderMT can now “digitally populate” an entire family of best-practice software products with data feeds from rules-based BIM files managed by CG Visions. For instance, CG Visions BIM files that contain options selections, framing, roofing specs and materials can now – without re-entry of data – integrate directly with the databases of BuilderMT’s allied accounting, estimating, customer relationship management (CRM) and warranty systems, all driven by BuilderMT’s multiple-award-winning Workflow Management Suite.

A hot topic in the construction sector, “Building Information Modeling” is a way to digitally manage the spatial relationships, geographic information, quantities and properties of building components. A BIM solution, which CG Visions provides, can model the construction process, while predicting quantities, extracting product specs, and creating scope of work documents.

Managing this data within BuilderMT’s best-of-breed solutions (called the BASE Alliance) was recently made dramatically easier with the introduction of the hot-selling Business Process Manager (BPM) software, which just landed a coveted spot on *Professional Builder* magazine’s “100 Best New Products 2008.” With BPM, users can “drag-and-drop” graphical icons that represent activities along the critical path of the construction process. As icons are aligned on the screen, C# code is automatically written to integrate dissimilar databases.

CG Visions, BuilderMT, BPM and the Base Alliance companies now offer the unprecedented ability to enter

data in any one of their systems and make it immediately available to all the systems, whether they are performing 3D-room scenario and architectural modeling, or sales, purchasing, estimating, workflow management, and warranty.

### About CG Visions

Recent awards for CG Visions include:

- ConstrucTech Companies to Watch, 2007
- IHTA Award winner for Best New Web product, 2007

CG Visions is the nation’s top provider of “Building Information Modeling” (BIM) consulting. The company offers 3D BIM design, digital-option-selection systems, and building information services through their BIM consulting, Residential Plan Service, Option management, Marketing Services, and their web based flex floor plan configuration tool – e-HomeInVision™. ### About BuilderMT

BuilderMT software has established itself as the best-selling, most award-winning software suite for residential home builders of nearly any size, with year-on-year growth that outpaces all of its competitors, combined.

Recent awards for BuilderMT include:

- Tom Gebes named to *Builder* list of the Fifty Most Influential People in the Home Building Industry, 2006
- *ConstrucTech* Hottest Company of the Year 2006
- *ConstrucTech* Vision Awards for 2006—Graham Hart Home Builder
- *ConstrucTech* Vision Awards for 2006 overall Team Award—Generation Homes
- *Home Builder Executive Magazine* 2006 Award for Scheduling Software
- *Home Builder Executive Magazine* 2006 Builder Technology Innovation Award

- Tom Gebes, President of BuilderMT, Ernest and Young Entrepreneur of the Year Finalists for 2006
- *ConstrucTech* Vision Awards for 2005—Delcor Homes
- *ConstrucTech* Hottest Technology of the Year 2005
- *TechHomeBuilder* High Impact Products of the Year 2004

For large and medium-size home builders in the \$250 billion home building industry, BuilderMT software provides highly customizable building process management software that works in tandem with Sage Timberline Office accounting and estimating software, systems used by one in four of the Builder 100. BuilderMT systems have been purchased by more than 600 corporations and 7,000 individuals that manage nearly 300,000 housing starts annually, more than 20% of the new-home market. BuilderMT is widely recognized as a leader in process-driven, best building practices for builders, as well as customer service, warranty applications, online training, and innovative wireless applications. Since its inception in 1999, BuilderMT has maintained its status as a debt-free, highly profitable company that invests its profits back into infrastructure and software development.
