## BuilderMT to Offer Builders Comprehensive Post-Construction Solution Through AxisPointe – Corrigo Partnership

*One-stop "Post-Construction" Solution for All Warranty, Document Management, Subcontractor Certification, and Service Dispatch to be Marketed as the BuilderMT Post-Construction Service*

**Lakewood, Colorado—August 14, 2007**—BuilderMT, the nation's leading provider of production management software for residential homebuilders, today announced a new partnership with AxisPointe, Inc., the national leader in warranty documentation management, outsourced call-back management, and subcontractor certification, and Corrigo<sup>®</sup>, Inc., the leading provider of wireless on-demand service and work order management solutions. Both companies are integrated partners with BuilderMT, and their combined, complementary services will be marketed as one seamless solution called the BuilderMT Post-Construction Suite.

"The BuilderMT Post-Construction Suite offers builders a range of solutions –seamlessly pre-integrated into BuilderMT users' workflows in scheduling, purchasing, and accounting – that is unrivaled in the U.S. housing markets," said Tom Gebes, president of BuilderMT. "Users would have to combine the services of more than three other solution providers to receive anything approaching what the BuilderMT Post-Construction Suite offers in one integrated, turn-key package."

The BuilderMT Post-Construction Suite will offer customized home-specific printed manuals, also in a digital and online format, that track every warranty or document associated with a new home. Combined with an outsourced call center solution to absorb homeowner calls from homebuyers in the builder's name, this post-construction solution is the most comprehensive service solution offered in the industry. When a problem arises, the BuilderMT Post-Construction Suite offers builders the opportunity to dispatch – with wireless route optimization -- service or technical resources to the home, and workers can determine whether the builder is even responsible for the cost of the repair, because they are pre-equipped with the data specific to that home, right down the model or part number at issue.

AxisPointe and Corrigo have already integrated their services to each other, and both AxisPointe and Corrigo are already integrated with BuilderMT software, the best-selling, most award-winning software sold to homebuilders today. More than 280,000 starts are managed by the BuilderMT Workflow Management Suite, 20% of today's new homes.

"AxisPointe and Corrigo are complimentary services," said Andrew Smith, president and founder of AxisPointe. "AxisPointe offers a

distinct, builder-branded, customer-facing service that archives warranty data online, in print, and on CD-ROMs. Corrigo extracts crucial data from AxisPointe's HomeProfile system to better equip the contractors and problem-solvers dispatched to a home or residence. By linking this all seamlessly into BuilderMT software, we have a service package that will revolutionize the post-construction arena for all builders that engage these services."

### About BuilderMT

For large and medium-size homebuilders in the \$250 billion homebuilding industry, BuilderMT provides highly customizable building process management software that works in tandem with Sage Timberline<sup>®</sup> Office Accounting and Estimating software, systems used by one in four of the Builder 100. BuilderMT systems have been purchased by more than 600 corporations and 7,000 individuals that manage nearly 300,000 housing starts annually, more than 20% of the new home market. BuilderMT is widely recognized as a leader in process-driven, best building practices for builders, as well as customer service and warranty applications, online training, and innovative wireless applications. Since its inception in 1999, BuilderMT has maintained its status as a debt-free, highly profitable company that invests its profits back into infrastructure and software development.

## About AxisPointe

AxisPointe - creator of HomeProfile - offers turnkey, outsourced post-construction services for residential homebuilders and multi-family housing developers. With special expertise in sectors where builders and developers have the highest legal exposure and greatest risk to their reputations (warranty management, call-back processing, and subcontractor insurance certification), AxisPointe offers three products in its SmartBuilder Suite:

**HomeProfile**, a digital, online, and print service that offers builders and developers a turnkey, outsourced solution of all post-construction warranty and document management, including service ticketing and delivery of a builder-branded manual.

**BuilderCertified**, a turnkey, outsourced service that leverages teams of researchers and Web-based tools to track subcontractors' licenses and liability insurance expirations, so the builder/developer can effortlessly pass his or her yearly insurance audits.

**BuilderOnCall**, an outsourced call center for builders and developers in the U.S., which provides service ticketing and issue escalation.

All three services offer remarkably affordable outsourced, time-saving solutions to builders' and developers' pesky problems: call backs, document tracking, and post-construction customer management.
