

BuilderMT's WMS Integrates With Explorer Contract Manager

***Integration Redefines Construction Software, as Explorer's
Browser-Based Accounting Brings Flexible, Powerful
Applications to BuilderMT's Expansive User Base***

Lakewood, Colorado — June 30 2010 — BuilderMT, North America's best-selling construction workflow software solution provider, today announced that its Workflow Management Suite has integration with Explorer Software Group's Contract Manager Version 7, a browser-based construction accounting solution.

The integration of BuilderMT's WMS to Explorer's Contract Manager redefines construction software. Now, BuilderMT's expansive user base has access to a new, highly-flexible accounting alternative, with extraordinary accounting features and analytics that work in tandem with BuilderMT's award-winning capabilities. Beginning immediately, BuilderMT clients benefit through a new and exciting upgrade path to Explorer's Contract Manager, a solution with global reach that already serves the largest construction companies worldwide.

In addition to sophisticated analytics that go far beyond standard credit-and-debit accounting, Explorer's Contract Manager also offers such features as unlimited user-defined fields and dashboards, Key Performance Indicators, the ability to calculate in multiple currencies, using multi-national tax systems, and even multiple languages. Additionally, with an Excel-like interface and a report wizard, Explorer can output fully-formatted Excel workbooks and allow users to design their format in Excel-like grids, all while merging data across multiple servers and companies. Because the Explorer Contract Manager is browser-based, users also benefit from the proven cost avoidance offered by a "hosted solution" for IT infrastructure, security, and personnel.

"This is a fully-integrated Production Management solution for homebuilders, and it offers exceptional functionality," said Tom Gebes, BuilderMT's president. "Combining the world-class operational benefits of BuilderMT's WMS with the leading-edge technology of Contract Manager Version 7 will provide expanded business opportunities for our customers and prospects alike."

"Explorer's Contract Manager solution is a real-time, one-time data entry solution, and we have now brought that to BuilderMT users," said Jim McFarlane, president and CEO of Explorer Software. "With BuilderMT's integration to Explorer Contract Manager, production homebuilders are able to seamlessly manage their building projects and simultaneously update their back-office accounting system."
