

BuilderMT Signed 115 New Builders in 2004, Making It Among the Homebuilding Industry's Best-Selling Software Providers

For Builder-Specific Software Designed for Medium- and Large-Sized Builders, BuilderMT is Among an Elite Class of Leaders In 2004 Sales

Lakewood, Colorado—January 13, 2005— BuilderMT, the nation's leading provider of production management software for residential homebuilders, today announced it had far surpassed its sales goal for 2004 by signing 115 new builders to its industry-leading software system. For builder-specific software systems focused on medium- and large-sized builders, BuilderMT's 2004 sales performance puts it in an elite class of best-selling software systems.

BuilderMT's 115th sale was to SummerHill Homes, a Palo Alto-based, San Francisco Bay Area homebuilder with a national reputation for superior design and quality construction. SummerHill Homes is an exemplary BuilderMT customer, as they have recently won *three* highly-coveted Gold Nugget Awards at the 2004 Pacific Coast Builders Conference. Focused on building high-quality homes, SummerHill Homes uses cutting-edge technology, like BuilderMT's, to make home building an exceptional experience for the homebuyer. For more information about SummerHill Homes, visit www.summerhillhomes.com.

In addition to its 2004 sales achievement, BuilderMT recently announced it has reshaped the competitive landscape of builder software systems by offering true, real-time, wireless scheduling in the field through a new Jobsite Field Management application, which BuilderMT will be demonstrating at the International Builders Show, in Orlando, booth W3943. In addition to wireless scheduling and document management through Tablet PCs, BuilderMT's Jobsite Field Management allows wireless scheduling application to work on Smart Phone, Palm OS PDA devices, or the Blackberry devices using NEXTEL (NASDAQ NM:NXTL) or other Blackberry Supported Service Providers.

Before introducing Jobsite Field Management, BuilderMT was already the homebuilding industry's most-advanced project management software. BuilderMT offers "*Click to Learn*" training (which can be done from the builder's desktop) and *One-Click Software* "Auto-Updates," where the latest version of BuilderMT is available for instant download through a convenient desk-top link.

BuilderMT has also just introduced a customizable, user-definable "BuilderMT Workflow Management Suite" desktop dashboard for controlling a builder's operations.

About BuilderMT

For large and medium-size homebuilders in the \$250 billion homebuilding industry, BuilderMT provides highly customizable building process management

software that works in tandem with Timberline Office accounting and estimating software. BuilderMT has been purchased by over 400 corporations and 2,800 individuals to manage over 140,000 housing starts annually. BuilderMT is widely recognized as a leader in process-driven, best-building-practices for builders, as well as customer service, warranty applications, on-line training, and innovative wireless applications. Since its inception in 1999, BuilderMT has maintained its status as a profitable company that puts its profits back into the infrastructure and software development.
