## BuilderMT Draws 200 Production Builders to Client Conference With New 4.0 Upgrade and Training During Four Day Event

Source: Business Wire  
Publication date: 2005-05-17

Work Flow Management Solutions, Wireless Scheduling and New Version 4.0 Functionality Excite BuilderMT Clients at Amelia Island Plantation Gathering

BuilderMT -- the nation's leading provider of production management software for residential homebuilders--today announced the participation of 200 production home builder clients at its annual Client Conference. This year's conference, held at Amelia Island (FL) Plantation the first week of May, attracted sixty (60) percent more client users than in 2004. BuilderMT hosted the four day event as part of their on-going campaign to deliver world-class Work Flow Management solutions to the nation's production builders. The event included multiple nationally known industry speakers, numerous training seminars and workshops on the current and new software functionality as well as a mini-trade show conducted by sponsors of companion software and hardware solutions that support BuilderMT capabilities.

BuilderMT presented all of the new functionality in their upgraded Work Flow Management Suite - 4.0 during the conference. Already highly acclaimed, BuilderMT 4.0 adds dramatic functionality that is specifically designed for clients of Timberline(R) Office. A powerful single "dashboard" screen presents data from multiple databases increasing productivity and accuracy for back-office personnel. 4.0's new functionality also includes document management features as well as automated, rules-based email distribution of key documents and data to

any email address. BuilderMT's wireless scheduling is fully integrated into the Work Flow Management suite and delivers scheduling and purchasing information directly to field users on a BlackBerry or PDA device. The new upgrade also includes enhanced back-end architecture that allows users to push large amounts of database information, pictures, drawings or complete files through the web with direct delivery to a TabletPC anywhere and at anytime.

"Our annual Client Conference is an integral part of our customer commitment and constant drive to add critical new functionality to our Work Flow Management Suite," said Tom Gebes, President, BuilderMT. "The rapid growth in our user base last year by over 115 new production builders, with 60 more already signed-on this year, demonstrates their hunger for our proven, stable solutions. The substantial increase in BuilderMT users participating at Amelia Island versus last year's conference is a testament to the value we deliver every day. We are particularly pleased with the enthusiastic responses and positive feedback we heard about our new 4.0 product and especially our open forum session with our clients, which continues our legacy of creating the right solutions that power profitable growth for the most demanding production builders in the country."

"Great - a wonderful way to talk with other clients to find out how they are using the software...also I'm very excited about 4.0. I enjoyed seeing the new features," said Stephanie Mulford from Norstar Residential based in Denver, Colorado.

"Very good breakout sessions for Scheduling and Tips & Tricks were great. I like that we're there with the Development team - they could answer questions and were knowledgeable. The networking with other homebuilders was very valuable," said Cathy McIntosh from Reno, Nevada based Tanamera Homes.

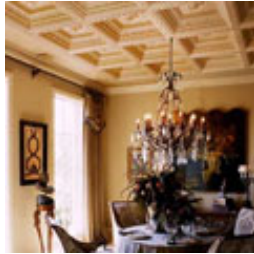

"The introduction to vendors and support companies and the willingness for BuilderMT to be so open and informative was valuable. We enjoyed meeting other professionals in the industry and sharing problems and solutions. The speakers were fantastic," said Doug Welborn from Texas based Tilson Homes.

### About BuilderMT

For large and medium-size homebuilders in the \$250 billion homebuilding industry, BuilderMT provides highly customizable building process management software that works in tandem with Timberline Office accounting and estimating software. BuilderMT has been purchased by over 400 corporations and 2,800 individuals to manage over 140,000 housing starts annually. BuilderMT is widely recognized as a leader in process-driven, best-building-practices for builders, as well as customer service, warranty applications, on-line training, and innovative wireless applications. Since its inception in 1999, BuilderMT has maintained its status as a profitable company that puts its profits back into the infrastructure and software development.
