BuilderMT Wins Two More "Gold Vision Awards" from Constructech, Adding to a Record-Breaking String of Awards

BuilderMT is By Far the Most-Award-Winning Technology Company Serving the Homebuilding Industry

Lakewood, Colorado — August 23, 2010 — BuilderMT, North America's best-selling construction workflow software solution provider, today announced that it has won two more top technology awards. *Constructech* magazine recognized BuilderMT in two categories as an enabling technology at its 2010 Vision Awards ceremony.

The *Constructech* Vision Awards honor companies that have realized the advantages of applying innovative technologies to their everyday businesses, as well as the technology enablers that have helped them achieve their goal, according to *Constructech*.

BuilderMT won a Gold Award in the "Builder/GC Residential \$26 million to \$100 million," as a technology enabler for Essex Homes Southeast. And BuilderMT also won a Gold Award in the "Builder/GC Residential \$6 million to \$25 million" category as a technology enabler for Vintage Homes. Just to illustrate the magnitude of the savings that Gold Award winners demonstrated, here is an excerpt from Vintage Homes Vision Award application: Upon implementing BuilderMT's Bid Management technology, Vintage Homes saved \$2,400 per bid, for every supplier or trade, including labor trades. Given that Vintage Homes started 11 communities on 2009-2010, and offered 24 models, the actual dollar savings were stratospheric.

“A record-setting string of technology awards is really a testament to our customers’ drive for excellence in their operations, and to the entire BuilderMT family, which provides such great products and services. We’re honored,” said BuilderMT’s president Tom Gebes.

About *Constructech* Magazine

From the perspective of the construction professional, *Constructech* magazine uncovers the necessary tools to increase productivity and profitability and reveals the value of information technology tools and building control automation.

About BuilderMT

For the construction industry at large, BuilderMT provides highly-customizable workflow and building-process-management software that works in tandem with leading accounting systems and other wireless and jobsite productivity tools, such as CRM and warranty management. Over the past 13 years, BuilderMT systems have been purchased by over 825 corporations and more than 7,000 individuals, as the Company has maintained its status as the sector’s best-selling, most-award-winning software product. Combined, the Company manages construction for around 20% of the U.S. new-home market. BuilderMT is widely recognized as a leader in process-driven, best-building-practices for builders, as well as customer service, warranty applications, online training, and innovative wireless applications.
