With "Jobsite Field Management" BuilderMT Offers True "Wireless Scheduling and Project Management" for Timberline Office Users

Thursday January 27, 3:42 pm ET

Using Tablet PCs, Smart Phones, Palm OS PDAs, or NEXTEL Blackberrys, BuilderMT Users Can Interact With Their Backoffice Software From the Field

LAKEWOOD, Colo.--(BUSINESS WIRE)--Jan. 27, 2005-- BuilderMT, the nation's leading provider of production management software for residential homebuilders, today announced it has reshaped the competitive landscape of builder software systems by offering true, real-time, wireless scheduling in the field through a new Jobsite Field Management application. No longer dependent on "hot sync" or "cradle sync" methods to coordinate data between field and office-based software systems, builders in the field using BuilderMT can now use common wireless devices to update any of a long list of field activities and access crucial back-office work-flow documents.

BuilderMT got rave reviews and experienced record software sales at the recent 2005 NAHB/IBS show in Orlando, where it showcased this new Wireless Scheduling and Purchasing application capability (a part of BuilderMT's new Jobsite Field Management application). Jobsite Field Management uses Tablet PCs to provide jobsite supervisors with unprecedented real-time, field access to job schedules, purchase orders, change orders, and quality control checklists, which the supervisor can update as field conditions change.

In addition to wireless scheduling and document management through Tablet PCs, BuilderMT's Jobsite Field Management allows the wireless scheduling application to work on Smart Phone, Palm OS PDA devices, or the Blackberry devices using NEXTEL (NASDAQ NM:[NXTL](#) - [News](#)) or other Blackberry Supported Service Providers. This unique scheduling application enables the following to be done remotely from the field:

- Schedule specific activities from the field
- Log in completion of individual activities from the field
- Trigger payment approval to Accounting for pay points
- Setup reminders and notes on scheduling activities
- Note variance assignments from the field
- View supplier contact information from the field
- View owner (buyer) information from the field

- [Most-viewed articles](#)

- Complete quality control checklists assigned to scheduling activities before completion of an activity
- Generate updated projected completion dates for the project and send back to accounting for liability tracking and report of project cash flow.
- Send Text Messages, email, or Direct Connect(TM) suppliers from the field.

Before introducing Jobsite Field Management, BuilderMT was already the homebuilding industry's most-advanced project management software. BuilderMT offers "Click to Learn" training (which can be done from the builder's desktop) and One-Click Software "Auto-Updates," where the latest version of BuilderMT is available for instant download through a convenient desk-top link.

BuilderMT has also just introduced a customizable, user-definable "BuilderMT Workflow Management Suite" desktop dashboard for controlling a builder's operations.

About BuilderMT

For large and medium-size homebuilders in the \$250 billion homebuilding industry, BuilderMT provides highly customizable building process management software that works in tandem with Timberline Office accounting and estimating software. BuilderMT has been purchased by over 450 corporations and 3,100 individuals to manage over 142,000 housing starts annually. BuilderMT is widely recognized as a leader in process-driven, best-building-practices for builders, as well as customer service, warranty applications, on-line training, and innovative wireless applications. Since its inception in 1999, BuilderMT has maintained its status as a profitable company that puts its profits back into the infrastructure and software development.
