BuilderMT Customized Business Processes (BuilderMT BPM)... right on your phone!

Finally, an application that gives contractors the ability to quickly and easily create automated processes. Our software, BuilderMT BPM, helps in the planning, building and managing of the business processes that are vital to a contractor's performance and success.

Here's what you can do with these phone applications:

BuilderMT Customized Business Processes (BPM)

Reduce operating costs by automating customized business processes

- Provide visibility into business processes and allow businesses to continually refine and remove costs from each process
- Quickly alter and deploy new processes
- Remove and communicate only the critical information, instead of constantly running reports
- Integrate with any database or any back-office system

Benefit in all areas of your business

- Customer change requests processes - from design center through drafting, estimating, purchasing, construction and sales contracts
- Automatic, scheduled report generation and distribution to staff and outside parties
- Sales payroll process that captures all sales and cancellations and calculates sale commissions

Members of Unified Purchasing Group receive

20% OFF
